Industry *B2B*

Natural and functional flours

We offer extruded corn, wheat or rye flour. Extruded flour has many uses: in bread to increase the efficiency and high viscosity of the dough and improves the freshness of baking products. In the food industry it is used as a thickener in soups and sauces, as a stabilizer in concentrates and as a healthy addition to spices and breadings. It is even used as a filler in the production of cold meats and dumplings. Available in various granulations. Other types of flour are available on request.

Crumbs

We offer crunchy delicious crumbs (breadings) made from corn or wheat; other kinds are available on request. We can also prepare various granulations.

Cornflake Crumbs 300 g

Mini Corn Balls

Mini balls made of corn flour (size 2-6 mm), other types of flour are available on request, just let us know your preferences. Mini balls are a common ingredient in popular snacks such as bars and are also used as a natural addition to yoghurt, toppings and sprinkles, etc.

OBST S.A. is one of the leading Polish producers of breakfast cereals, crispbread, and extruded products for the industry, such as flours, crumbs, and mini products. The company was founded in 1997 in Chełm by entrepreneur Bogusław Obst. Since then, it has developed dynamically, continuously expanding its product portfolio. Thanks to their high quality and excellent taste, OBST products quickly gained recognition among consumers. Today, the company operates across Poland and in many countries throughout Europe, Africa, and Asia, offering a wide range of breakfast products and grain-based snacks.

From its very beginning, the company's mission has been to produce top-quality breakfast foods made from natural, carefully selected ingredients – and, above all, at competitive prices.

The greatest strength of OBST S.A. products lies in the absence of preservatives and artificial additives, as well as in the advanced manufacturing processes that preserve the wealth of natural vitamins and micronutrients contained in the ingredients – especially wholegrain flours and fruit.

The people behind OBST S.A. are another key to its success. The company owes its achievements equally to its skilled and dedicated production staff and to its young, dynamic management team.
